

Sensors and Materials

Special Issue on Sensing Technologies and Their Applications (II)

Call for Papers

It is known that a sensor can be a device, module, or subsystem whose purpose is to detect an event or a change in its environment and send the information to other electronic components. Different sensors have different functions. Basically, sensors can be classified according to their working principle, technology, and application. Different types of sensors have different sensing objectives such as industrial signal sensing, communication signal sensing, and biomedical signal sensing. This special issue focuses on sensing technologies and sensor applications. All articles related to sensor design technology and applications are welcome.

Scope:

Sensing technologies	Sensing devices and systems
Sensing applications	Advanced sensor materials
Sensor networks	Sensing and imaging
Wireless sensor/actuator networks (WSAN)	Micro and nanosensors
Sensor interface	Multi-sensor data fusion
Analysis of sensing measurements	Intelligent sensor and sensing system
Internet of Things	Signal processing in sensor systems

Submission due date: Aug. 30, 2021

Publication date (planned): Second half of 2021

Journal website: <https://myukk.org/>

Guest Editor: Prof. Rey-Chue Hwang (I-Shou University)

Submit to: Online Manuscript Submission System (<https://myukk-org.ssl-xserver.jp/form/>)

(Attention)

As stated in Instructions to Authors in the Guidelines, the author(s) will be obliged to pay the publication fee upon the acceptance of the manuscript for publication (for example, JPY 99360 for 10 pages in *Sensors and Materials* format). If the quality of the English of your manuscript does not satisfy the journal standards, the authors should bear the proofreading fee (JPY 10000–30000), which will be charged with the publication fee.

If you have any questions, please feel free to contact the editorial staff at the address below.
